1.0

ISSUED

June 27, 2026

PLATFORM

Kinetic

CONFIDENTIAL · CONTROLLED DOCUMENT

This maps system capabilities to clauses of the standards MedQMS is designed to support.

Mappings, interpretations, retention periods and approval rules are configurable and must be reviewed and approved by the customer's quality and legal functions. Software does not by itself confer compliance or certification.

Legend: **13485** = ISO 13485:2016 · **QMSR** = 21 CFR Part 820 / QMSR (eff. 2026-02-02, incorporating ISO 13485) · **14971** = ISO 14971:2019 · **Part 11** = 21 CFR Part 11 · **MDR** = EU 2017/745.

CAPABILITY (MEDQMS)	13485	QMSR / PART 820	14971	PART 11	EU MDR
Document & record control (documents , revisions, effective/obsolete)	4.2.3– 4.2.5	820.40	—	11.10(b,c)	Annex IX 2
Management review package (mgmt–reviews)	5.6	820.20(c)	—	—	Art. 10(9)
Quality-event intake / data analysis (quality-events)	8.4	820.100, 820.250	10	—	Annex III
Nonconforming product & MRB (nonconformances)	8.3	820.90	—	—	—
CAPA lifecycle incl. effectiveness (capas , capa-actions)	8.5.2– 8.5.3	820.100	—	—	Annex IX
Complaint handling & vigilance (complaints)	8.2.2	820.198	—	—	Art. 87–92
Reportability decision & deadlines (MDR/MIR fields)	8.2.3	803 (MDR)	—	—	Art. 87
Internal/supplier/external audits (audits , audit-findings)	8.2.4	820.22	—	—	Annex IX 2.2
Auditor independence	8.2.4	820.22	—	—	—
Supplier qualification, scorecards, SCAR (suppliers , scars)	7.4	820.50	—	—	Annex IX 2.2
Training & competency (training–records , matrices)	6.2	820.25	—	11.10(i)	—
Risk management file (risks , residual, benefit-risk)	7.1, 0.2	820.30(g)	4–10	—	Annex I 3
Post-production information → risk	8.4	820.100	10	—	Art. 83 (PMS)
Design & product records (DMR via products)	7.3	820.30, 820.181	—	—	Annex II
Equipment, calibration, OOT (equipment)	7.6	820.72	—	—	—
Change control + impact + validation (change-requests)	7.3.9, 4.1.4	820.30(i), 820.70(b)	—	—	Art. 10(9)

CAPABILITY (MEDQMS)	13485	QMSR / PART 820	14971	PART 11	EU MDR
Append-only audit trail (actor, time, old/new, reason)	4.2.5	820.180, 820.186	—	11.10(e)	Annex IX
Electronic signatures (meaning, re-auth, binding)	—	—	—	11.50, 11.70, 11.200	—
Record retention (configurable)	4.2.5	820.180(b)	—	11.10(c)	Annex IX 8
Access control / least privilege (KSL)	4.2.5, 6.2	820.180	—	11.10(d,g)	—

How each control is evidenced in the system

- **Audit trail (11.10(e), 820.186):** `audit-trail` form — append-only; every regulated edit records actor, timestamp, field, previous → new value, reason for change, workflow state, source and correlation ID. Surfaced per-record in the record-360 timeline and globally in **Admin → Audit Trail**.
- **Electronic signature (11.50/11.70/11.200):** `esignatures` form — re-authenticated signing event with printed name, meaning (configurable list), reason, record version, method and tamper-evident hash, bound to the signed record. CAPA/complaint/change/document/MR closures are signature-gated.
- **CAPA effectiveness (8.5.2):** closure blocked until actions verified, effectiveness criteria defined and result = Passed, with an *independent* effectiveness signature (separation of duties).
- **Reportability (820.198 / MDR Art. 87):** complaint reportability decision and regulatory due date tracked; breaches escalate and appear on the executive dashboard ("Reg. Reporting Overdue").
- **Risk file (14971):** initial → residual risk with controls, verification and benefit-risk decision; post-production signals link complaints/CAPAs/NCs back to the impacted risk.

Disclaimer. This matrix is a configurable *aid to demonstrating* process coverage. It is not a certification, legal determination, or guarantee of regulatory acceptance. Customers must validate the system for their intended use and obtain quality/legal sign-off on all mappings.
